REPORT
OF
THE AUDITOR

OF THE STATE OF ALABAMA,

FOR THE

Fiscal Year Ending 30th September, 1869,

TO THE GOVERNOR.

MONTGOMERY, ALA.:

JOHN G. STOKES & CO., STATE PRINTERS.

1869.

REPORT.

STATE OF ALABAMA, *Auditor's Office,* }
Montgomery, Oct. 1st, 1869. }

To his Excellency, William H. Smith,

Governor of Alabama :

SIR—In compliance with Section 20, Article V, of the Constitution, I have the honor to submit, for transmission to the General Assembly, the Annual Report due from this office, for the fiscal year ending September 30th, 1869, together with such suggestions, “plans and estimates as are deemed expedient for using the public money to the best advantage, for diminishing the public expenses, and sustaining the credit of the State,” as required in Section 414, par. 17, Revised Code.

The operations of this department, accompanied with statements in detail for the fiscal years 1866–7, and 1867–8, will be found in the Appendix, to which attention is called.

There was, at the close of the fiscal year ending September 30th, 1868, a balance in the treasury, as shown by “statements” referred to of.....\$ 215,787 07

To which, if we add receipts from all sources

during fiscal year ending September 30th,

1869, amounting to.....1,306,311 38

Will make a total amount to be accounted

for of.....\$1,522,098 45

The disbursements for the current year have

been.....1,394,960 30

Leaving a balance in the Treasury, Septem-

ber 30th, 1869.....\$ 127,138 15

If the amounts paid as interest on trust funds, and interest and commissions on bonded debt, be deducted from total disbursements, the balance, amounting to \$416,171 45, will represent the total expenses of the State government for the year.

The receipts from taxation and licenses for the year just closed, as shown by Exhibit No. 8, amount to \$686,451 02.

Statements in detail, giving full exhibit of the condition of the State Treasury, together with receipts and disbursements, enumerated as required by law, will be found in "Exhibits" appended to this Report.

It will be remembered that the revenue derived from tax on property during the year, was under the late revenue law. This was larger than estimated in my special report, dated November 10th, 1868, to the Committee of Ways and Means of the General Assembly, the amount being \$564,391 96, to which, if we add the amount received from licenses, &c., under the present law, we have a total revenue of \$686,451 02. This amount, it will be seen, is insufficient to meet the current expenses of the State government, and discharge interest on bonds, trust funds, &c., for the year 1868-9, as was predicted in special report referred to.

The State indebtedness of Alabama has increased annually since 1860, when the total debt was \$5,753,521 33. To-day the aggregate indebtedness of the State amounts to \$8,356,083 51, as per Exhibit No. 4. It is highly gratifying to me, as doubtless it is to your Excellency, and the people of the State, that the Legislature, by the adoption of the Revenue Act, approved December 31, 1868, has made provision for raising sufficient revenue to meet liabilities, so that future reports will not show increased indebtedness, if the taxes are properly collected, and the money judiciously expended in the liquidation of claims against the State. The revenue laws now in force will, I hope, furnish means, not only to pay current expenses and interest upon the public debt, but also furnish a margin for a sinking fund, which I would most earnestly recommend to your Excellency, and through you to the General

Assembly, for the discharge of certain claims against the State hereinafter mentioned.

REDUCTION OF RATE OF TAXATION.

Should the General Assembly make no material change in "subjects of taxation" or "license laws" now in force, I feel authorized to recommend a reduction of the rate of taxation upon real estate and personal property from three-fourths of one per cent. to six-tenths of one per cent.

In recommending so large a reduction, I feel assured that the deficit made thereby in rate of per centage, will be largely compensated by increased aggregate assessments for 1870, over those of the present year.

Property has generally appreciated throughout the State within the last year, while the crops of cotton, corn, &c., give assurances of increased prosperity in the future.

REVENUE LAWS.

Under former Constitutions of this State the revenue derived by taxation was from assessments largely *specific* in their nature, and the requirements made by law upon this office, to point out "subjects of taxation" and furnish such information as the Legislature should possess before completing laws for revenue, were much needed, if not indispensable. This information is not now necessary in detail, as formerly. Under the present constitution, the revenue to be raised must be largely from assessment *ad valorem* upon property. Every species of property pays the same rate of taxation under the laws now in full operation in the State.

So great a change in the manner of assessment, must of necessity work material changes in amounts assessed and paid as taxes by the various tax payers of the State. The poor are much relieved under *ad valorem* assessments, while men of property, who are better able to bear the burthen, must necessarily pay a larger proportion than formerly.

The true theory of taxation in my judgment, lies in so adjusting the weight to be borne, that it will rest equally upon the shoulders of all the people; giving exemption to

the struggling poor, of such amount of property as may be deemed sufficient to keep them from the lists of charity, and encourage to a manly independence.

To secure an equal distribution of taxes among the tax payers of each county, a board of equalization has been provided by law, with all needed powers to adjust and equalize the taxes levied in their respective counties. No provision of law, however, exists, to secure an equalization of assessments of State tax among the several counties, and thus protect each county in the State against unequal taxation. An examination of the "Abstracts of Assessments" on file in this office, clearly shows the fact that tax assessors in the various counties, although under the same instructions, bound by the same oath, and under the same bond for fidelity in office, differ very materially in judgment, as to what is a "full, fair and just appraisal" of real and personal property. Nor is this to be wondered at, or complained of, yet the same result invariably transpires, viz: some counties pay much less than their just proportion, while others are required to pay more.

STATE BOARD OF EQUALIZATION.

I would therefore recommend that the revenue laws be so amended as to provide for a board of equalization for the State, giving ample powers to adjust and equalize the assessment and taxation for State purposes among the several counties, from a thorough inspection of returns by "abstract" furnished to this office from the Chairman of the County Board of Equalization in each county. This board should consist of three to five members, and the men selected should be thoroughly acquainted with the resources of the State, and conversant with the value of real and personal property.

COLLECTION OF TAXES ON REAL ESTATE.

The change in the laws regulating the collection of taxes on real estate has had a most salutary effect upon returns made to this office. The amount of money has been greatly increased, with a corresponding decrease of "cer-

tificates of lands bid in by the State." The total amount for "lands bid in" from all the counties in the State is not so great this year as from a *single county* last year.

A careful compliance with the law by tax assessors and collectors, compels the payment of tax on real estate by securing to the purchaser at tax sale a good and sufficient title to the real estate sold for taxes, unless redeemed as by law required. Under these just provisions of law, all owners of real estate are placed upon an equality of condition and rights, so that the defaulting tax payer can not injure and prejudice the prompt tax payer, as was very apparently the case under the late revenue law.

I would recommend that Section 47, Revenue Laws, be so amended that the tax collector will be required to give *full description* of each parcel of real estate upon which taxes are paid. Without this, great confusion will arise under sales of lands for taxes which may be marked as "non-resident" by the assessor. The tax payer should receive such voucher for money paid as will protect him in his title to real estate, and also from loss, in case the tax collector, by mistake or otherwise, advertises and makes sale of the same property, executing a deed to the purchaser.

EXPRESS COMPANIES.

This office is officially informed, by the Southern Express Company, that it is entirely impracticable for them to comply strictly with Paragraph XI, Section 12, Revenue Laws; and default has been made by all Express Agents throughout the State, as far as officially advised. This company will, doubtless, ask for relief from the Legislature during the next session, when the merits of the question involved will, if necessary, be better discussed than in these pages, in a special report from this office.

LICENSES.

The operations of the Revenue Department have been as smooth and satisfactory as could have been expected, under such material changes as was required by the Constitution of the State; yet, experience suggests several

modifications, especially in reference to licenses required. Dealers in tobacco and cigars, also dealers in fire-arms, are compelled to pay full license for dealing in these articles, regardless of the amount of their annual sales. This has worked a hardship upon small dealers, and upon those who sell these articles in connection with other merchandise, making the sale of tobacco and cigars, or fire-arms, an incident to their general trade. It has been suggested, that the license should only be required of merchants who dealt *exclusively* in these articles. A moment's reflection, however, will convince any one that should the statute be thus modified *no* license need be taken out, as persons now dealing in tobacco and cigars, or in fire-arms, could at once add other articles to their stock, and thus evade license tax. To say that a person who deals in tobacco and cigars, (even as an incident to his trade,) is not a "tobacco and cigar dealer," as some have claimed under the present statute, is but an attempt to create a distinction where there can be legally no difference.

I would recommend that the law be so changed as to lessen the license to small dealers in those articles, while at the same time great care should be taken that no evasion of the license tax required may become practicable. I would also recommend a change of the language of the revenue laws in reference to wholesale dealers in liquors so that it will read "any person who shall sell, or in any way dispose of such liquors in any quantity of one quart, or greater than one quart," &c.—(Sec. 112, par. 5.) The language now used forbids the wholesale dealer from selling, unless in quantities *greater* than one quart, and under the ruling of this office, which was in conformity with the law, any dealer selling it "by the quart" was deemed a retailer, as he alone had the right to sell one quart or less.

Complaint has been made, and I think justly, by small dealers who make the sale of liquor at wholesale an incident to a general trade, that the license required of them is onerous, and especially so in cities of over five thousand inhabitants, making it in many cases *absolutely prohibitory*. So long as the sale of liquors is licensed by the State, I

would ask that the law be so amended, that it will not forbid the merchant with small means to enter a trade which is deemed profitable for more extensive dealers.

A question has arisen as to the true construction of section 112, par. 17, 18 and 19, Revenue Laws. The decision of this office, under section 120, is that each dentist, physician, surgeon and lawyer, is liable to pay license tax as required by law; and this being for the practice of a profession, it was also ruled that no further license should be required for practice in other counties of the State, so long as residence was not changed from the county in which annual license was paid. This ruling by the Auditor was deemed to be the true intent and spirit of the law, and was in accordance with United States Revenue decisions in like cases. While it was claimed by some, that a strict and literal construction of the law would warrant a firm, or company, to take out license in the name of such firm, or company, it was also apparent that the same construction of sections 106 and 107 would also require a separate and distinct license in each county where such person might practice his profession. It is therefore respectfully recommended that an "act explanatory" be passed by the General Assembly, which will settle and fix the construction of law in all such cases. I would further suggest that the amount required of lawyers be made to correspond with that of other professions.

LOTTERIES.

Attention is further called to the fact that the license required of "lottery ticket dealers," (sec. 112, par. 2,) has been resisted by owners of lotteries, notwithstanding the precision of the paragraph referred to. It is claimed by these owners of lotteries that they hold and possess a franchise granted by the Legislature, as specified in their several charters, for which they pay, or agree to pay, a stipulated price, named and recited in said charter, and that so long as they comply with the requirements thereof they have full right to sell, and offer at public sale, through-

out the State, the tickets of such lotteries, without paying further tax.

This right is urged with a great degree of fairness upon the part of owners of lotteries chartered by the State. Knowing, however, that should this construction be held as correct, the State would receive no benefit whatever from licenses to "dealers in lottery tickets," and thereby defeat the object and intent of the law ; (as no one under the law can vend, or offer for sale any *other* tickets than those of companies chartered by the State;) it was announced as the decision of this office that all dealers in lottery tickets of whatever company, except the one exempt by paragraph referred to, were liable to pay license tax as required by statute before making any sale of such tickets.

In making this ruling, I was governed by the theory which I deem correct, that the possession of a franchise by a company for specific purposes, does not entitle its agent to perform any duty connected with the company, without first complying with the laws enacted for the government of all such agents. The requirements made upon home, or local insurance companies, furnish to my mind a parallel case in point. These companies receive and become seized of a franchise by complying with the general or special enactments of the General Assembly, and are authorized by law to transact insurance business throughout the State ; yet they do not claim, nor can it be fairly inferred, that their agents should, by right, act as such without first complying with the statute which requires *all* insurance agents to pay a State license of five dollars for each company represented.—(Sec. 112, par. 16, Revenue Laws.)

I would recommend that such amendment be made to the Revenue Laws as will leave this matter in no further doubt, and thus relieve the whole question from further embarrassment. If the construction of law, as made by this office, is correct, it will at least require an "act explanatory" of the paragraph referred to ; but if this does not meet the views of the Legislature, they will, without doubt, make the language precise, so that it can receive but one construction.

LICENSE TAX FOR SCHOOLS.

Under a late decision of the Supreme Court, the money arising from certain licenses in the city and county of Mobile, and levied and collected by the State, has been confirmed to the School Commissioners of that county for school purposes under an act approved January 16th, 1854. While I will not discuss at this time the propriety of diverting any or all moneys collected by the State from licenses to the use of schools, except to suggest that the State is already largely indebted to the school fund, and the old maxim, "Be just before you are generous," might well be heeded; yet I would earnestly recommend that whatever benefits arise to the city and county of Mobile from this fund so diverted by the enactment, should also be extended to all the counties in the State. Should this, however, be deemed impracticable by the General Assembly, I would recommend that this special act be repealed.

No one could, for a moment, claim that equal and exact justice would be meted out to the remaining counties of the State, while granting an appropriation of State funds to the amount of ten thousand dollars, more or less, to the county of Mobile for local purposes, and at the same time refusing the same appropriation, or diversion of public moneys, to other counties in the State. So long as other counties are required to pay into the State treasury *all* moneys collected for licenses issued by the State, it will be palpably unjust to require less of the city and county of Mobile.

THE PUBLIC DEBT.

The bonded and other obligations of the State will be found in detail in "Exhibit No. 4," to which special attention is called. It will be seen from the exhibit that \$688,000 in sterling bonds fall due and become payable in London in 1870. These bonds are renewable at the pleasure of the State, yet I would recommend that careful consideration be given to the suggestion, whether it might be a measure of economy to cancel them at maturity. Although the sterling bonds are at a "rate per cent." nominally lower than a portion of our bonds due in New York; yet it will

be found upon an examination of accounts rendered for interest, &c., paid by the State, that for the last four years we have paid larger interest upon sterling bonds, than upon any other indebtedness of the State, amounting at times to more than eleven per cent. per annum, including premium on gold, sterling exchange, commissions, &c. This suggestion is thrown out solely in the interest of economy to the treasury, and to place our bonds where we can the more readily control them and their coupons when paid. A large amount of sterling bonds which have been paid still remain out of the possession of the State, together with a large amount of coupons past due, although money has been regularly remitted to London for their cancellation.

I would, therefore, recommend that the General Assembly should, by an act, give authority to your Excellency to cancel or renew these bonds, as in your judgment may be for the best interests of the State, at the date of the maturity of the same. The recommendations made in this report in reference to provisions of law for the extinguishment of the public debt, at no distant day, will, I earnestly hope, receive the careful attention of the executive, and legislative departments of the State. Measures should be adopted to relieve the State of the burthens now imposed, for interest upon trust funds, at least, so that the "bonds issued by the State" will represent the only indebtedness which will require a tax levy upon the people to cancel and discharge. This can be done slowly but surely by the creation of a "Sinking Fund;" and through this means the State can steadily cancel and discharge her obligations.

Retrenchment and economy in the public expenditures, with rigid and careful collections of dues, and their proper application, will most certainly pay and discharge the public debt of the State without great hardships to the people. When this is accomplished, or when the obligations of the State are reduced to the bonded debt alone, taxation for State purposes will become comparatively light, and easily paid.

Alabama stands in a proud position in the financial

world—the integrity of her people is unquestioned, and nothing but a gross mismanagement of her finances will cause her credit to materially decline.

Attention is called to the suggestions made in reference to “State endorsement of Railroad bonds.” This is so intimately connected with the credit of the State that your Excellency will doubtless give it careful consideration.

RAILROADS.

It is with pleasure I call your attention to Exhibit No. 5, which shows in detail the length, value, &c., of each railroad in the State, as received in this office by “returns” made under requirements of section 24, Revenue Laws.

This is the most complete record of railroads officially announced that has ever been made in the State.

We have, as per summary statement, a total length of railroads of 916 $\frac{20678}{52800}$ miles, with total assessed value of eleven million ninety-five thousand seven hundred and ninety-one dollars and thirty-three cents, including right of way, main and side track, and rolling stock.

Under the Constitution, Sec. 4, Art. 13, the property of all corporations is held “forever subject to taxation,” the same as property of individuals, and the Revenue law, in compliance therewith, requires the same assessment and tax upon railroad property as is required of private persons. In the practical operation of this law it works a hardship upon unfinished roads, as their traffic and income is comparatively light, until connection is made with other lines of transportation. It is claimed even by owners of *through lines* of railroads, that the tax now levied by the State (three-fourths of one per cent.) is so onerous that no road can pay it without embarrassment. Relief should be given by the General Assembly from onerous taxation whenever it can be done. I would recommend, therefore, a careful consideration of the whole question, and hope that relief may be granted, especially to unfinished roads, in whatever measure it can be done within the limits of the Constitution.

STATE ENDORSEMENT OF RAILROAD BONDS.

While I fully concur in all legislation favoring the de-

velopment of the resources of the State by giving its credit in aid of internal improvements, so far as it can be done with safety, yet I am constrained to call your attention to the following facts. The total value of railroads in the State, as per assessment returns made to this office, including right of way, main and side track, rolling stock, &c., is less than thirteen thousand dollars per mile, more fully shown in Exhibit No. 5, to which reference has been made. When it is remembered that these items include all of value that can be embraced in "First Mortgage Bonds" upon any railroad, and when it is further known that the returns are made under the affidavits of the President and Secretary of the several roads, that such was a "full, fair and just valuation of the same," it will be readily seen that the State cannot be safe in the endorsement of railroad bonds to the amount of sixteen thousand dollars per mile nor would she be free from loss should default be made by the railroads, in payment of interest or principal of said bonds.

I would therefore recommend the repeal of the law giving endorsement to railroads to the amount of sixteen thousand dollars per mile, or amendments to the same requiring the endorsement not to exceed ten thousand dollars per mile.

It is scarcely necessary for me to say anything further upon this subject, as the Constitution of the State forbids the General Assembly giving any endorsement except "on undoubted security."—(Sec. 33, Art. 4.) Unless this recommendation receives the attention of the Legislature, and the amount for which the State becomes liable, is reduced to the standard of "undoubted security," as required in the Constitution, the State will, at no distant day, be compelled to assume and pay a large portion of these bonds, which would not only embarrass her finances, but very materially affect her credit, which is to-day among the best in the Union.

This will become apparent to the General Assembly, when petitioned to reduce taxation upon all railroad property. If railroads, when completed, cannot pay without

embarrassment a State tax of three-fourths of one per cent. upon a valuation of less than thirteen thousand dollars per mile, will they not be further embarrassed, if not bankrupted, in attempting to pay eight per cent. interest upon first mortgage bonds to the amount of sixteen thousand dollars per mile? The railroads that have not received "State aid" in their construction, as well as all other tax payers, are largely interested in the action of the General Assembly upon this question. Should default be made by companies receiving State endorsements, all railroad companies, together with other tax payers, would be required to pay their equal proportion of the burthen thus thrown upon the State. The history of endorsement of railroad bonds in other States should be carefully studied, and this would, in my judgment, secure a change in the law at least to the extent of a reduction to the constitutional requirement of "undoubted security." The State would then be fully protected should default be made by railroad companies in payment of interest or principal.

Endorsement by the State has been obtained under existing laws by the following companies:

Alabama and Chattanooga Railroad.....	\$1,800,000 00
Montgomery and Eufaula Railroad.....	480,000 00
Selma, Marion & Memphis Railroad.....	320,000 00
Total.....	<u>\$2,600,000 00</u>

GENERAL SCHOOL FUND INDEBTEDNESS.

It will be seen by an examination of "Statement of the Public Debt of this State," (see Exhibit No. 4,) that what has been reported by former Comptrollers as "School Fund" and "University Fund," is noted in this report as "School Fund Indebtedness" and "University Fund Indebtedness."

After a careful review of the whole history of these "Trust Funds," I am compelled not only to report them as State indebtedness, but to say further, that the State of Alabama has not, in my judgment, complied with the laws under the provisions of which she received these funds, in trust, for the benefit of schools and the University.

By reference to Statutes at Large, vol. 3, page 490, and vol. 4, page 237, it will be observed that these funds were to be held by the State as a sacred trust for a specific object, viz: for educational purposes, and for no "other purpose whatever."

In reference to the "Sixteenth Section Fund," the statute conferring the trust upon the State, and giving her power to sell the lands, donated by the United States to the people for schools within the several townships of the State, also specified and *directed* that the money arising from the sale of all such lands "should be invested in some productive fund, the proceeds of which shall be forever applied under the direction of the legislature for the use and support of schools."

The following is the text of the act in relation to the 16th Section Fund referred to, which clearly defines what was required of the State in relation to this fund:

"An act to authorize the Legislature of Alabama to sell the lands heretofore appropriated for the use of schools in that State.

Be it enacted by the Senate and House of Representatives of the United States, in Congress assembled, That the Legislature of the State of Alabama shall be, and is hereby authorized to sell and convey in fee simple, all or any part of the lands heretofore reserved and appropriated by Congress for the use of schools within said State, and to invest the money arising from the sale thereof in some productive fund, the proceeds of which shall be forever applied, under the direction of said Legislature, for the use and support of schools within the several townships and districts of the county for which they were originally reserved and set apart, and for no other use or purpose whatsoever; *Provided*, said land or any part thereof shall in no case be sold without the consent of the inhabitants of such township or district, to be obtained in such manner as the Legislature of said State shall by law direct; *and provided, also*, that in the apportionment of the proceeds of said fund, each township and district aforesaid shall be entitled to

such part thereof, and no more, as shall have accrued from the sum or sums of money arising from the sale of the school lands belonging to such township or district.

"Sec. 2. *And be it further enacted,* That if the proceeds accruing to any township or district from said fund shall be insufficient for the support of schools therein, it shall be lawful for said legislature to invest the same as hereinbefore directed, until the whole proceeds of the fund belonging to such township or district shall be adequate to the permanent maintenance and support of schools within the same.

"Approved March 2, 1827."

The several amounts received by the State, as trustee for "Educational purposes," and due these trust funds, prior to December 1, 1860, as shown by the records of this office, are as follows:

Sixteenth Section Fund.....	\$1,499,343 83
Valueless Sixteenth Section Fund.....	97,091 21
University Fund.....	300,000 00

Total.....	\$1,896,435 04
Amount paid in from December 1, 1860, to December 1, 1867.....	\$ 310,794 12

Total.....	\$2,107,229 16
Amount received since Dec. 1, 1867.....	209 75

Aggregate	\$2,107,438 91
-----------------	----------------

The inquiry is very properly made, "what has the State, as trustee, done with this money?" Has it been invested in some productive fund?—

No vestige of it can be found in this office, of any value whatever, whether in bonds, stocks, bills receivable, buildings or other property, and the only answer which is found of late record is that "it is held in trust by the State for school purposes." "Upon this trust fund, which is held in perpetuity, the State pays interest annually at the rate of eight per cent."—(See ex-Gov. R. M. Patton's address,

dated July, 1868 ; also, ex-Gov. L. E. Parson's proclamation, dated 20th July, 1865.)

To the proposition that it is "held in trust by the State," I would say that this cannot be the fact, as it is impossible for the State "to hold in trust" what does not exist. This fund is not *in esse*, and cannot be held in trust by any trustee. It is lost, or misapplied, and this compels the further statement above referred to, that "it is assumed" or "held in perpetuity by the State." By what right does the State assume it in perpetuity ; certainly not by statute which provides that it shall be "invested in some productive fund."

If this assumption "in perpetuity" by the State has any significance, it must mean that the money has been lost or misapplied, and the State has been driven to the necessity of either accepting the amount as a debt, or repudiating the trust reposed in her. She very properly admits the misapplication of the fund, and says by statute, "I will assume it as a debt and pay interest upon it till the debt is discharged."

Can this fund be, by right or sound policy, assumed in perpetuity ? I answer by saying that the State should assume no such right, although she may have, by a technicality of law, the privilege of so doing, for, in my judgment, so long as this state of affairs continues she *does* virtually repudiate the trust reposed in her, by compelling the people of the State, who are, by law, the beneficiaries of this fund, to pay as a taxor debt, that which they should receive as a bonus or gift for themselves and their children for school purposes forever.

A little reflection will satisfy the most superficial thinker that this fund has been misapplied, or lost by the bad management of the trustee. It has been *so used* that the very object for which it was donated to the people of the State, and of the several townships, has been entirely frustrated and defeated. What was intended as a bonus has become a burthen. What was to have been an annual gift, has become a debt—to be paid by direct taxation.

If the theory that this trust fund should be "assumed in

perpetuity" be correct, and that the "principal shall never be paid," as is claimed in grave State papers upon this subject, then, indeed, it becomes a source of profound thankfulness that the United States Government devoted so small a sum as \$2,107,438 91 for educational purposes, as provision can be made by law for the payment of eight per cent. upon that amount by a direct annual tax of \$168,595 11 upon the people of the State. If, instead of this amount, the United States Government had given us the munificent sum of *fifty millions* of dollars, for educational purposes, the people of the State, under the theory and practice of "*assumption of this fund in perpetuity*," would now be taxed for school purposes alone, the full sum of *four millions* of dollars annually. The greater the beneficence of the general government, the more dire the calamity to the people, and the more terrible their taxation!

We should then present the anomaly, rarely if ever witnessed in history, of a people driven to the verge of bankruptcy, by becoming the recipients of most princely donations, given by a beneficent government! It is, to me, a matter of astonishment that such theory should be deemed correct by any one conversant with the laws which govern the management of trust funds, and define their relation to *cestui que trusts*. I fully concur in the following statement of Mr. Joel Riggs, the Comptroller of the State Treasury in 1851: "*Perhaps, of all trust funds, none has been so greatly mismanaged as the School Fund of Alabama.*" The Constitution, Art. XI, Sec. 10, provides that the moneys above referred to, with other items of value there enumerated, "shall be and remain a perpetual fund, which may be increased, but not diminished," &c.

Until the money due this fund is placed where it will not require a direct levy of tax for annual interest upon the people, who are the beneficiaries thereof, it cannot be called in any just sense a "School Fund," but is as clearly a debt as any other portion of her obligations.

A State debt, in my judgment, cannot become a "perpetual fund," as contemplated in the Constitution.

The State will never carry out and discharge the trust

reposed in her by the general government, until this indebtedness ceases to call for a tax upon the beneficiaries of this fund to discharge the annual interest thereon. So long as this disposition of these funds is continued, the people are substantially without a school fund.

Until a change is made, schools must be kept up and paid for by a direct tax, to the full amount expended for free schools in this State. No trust fund should ever become a burthen to the beneficiaries thereof, nor should it become an indebtedness of the trustee, unless default is made in executing the trust, and in such case restoration should be made at once, or in the shortest time possible. There is no authority for the assumption "in perpetuity" of such fund, unless there is authority for its *practical repudiation* by the State.

For the foregoing reasons and many others which press themselves upon my mind, I am forced to the position first stated, in relation to this fund, and place it upon this report as an *indebtedness* of the State, for moneys lost or misapplied.

Believing that the State is solemnly bound to discharge the trust imposed in her, in relation to this fund, as before stated, I most earnestly recommend, that by action of the General Assembly, such laws shall be passed as will, in their execution, restore this fund to the condition indicated by statute, viz: "Invested in some productive fund, the proceeds of which shall forever be applied under the direction of the Legislature for the use and support of schools." For this purpose it would, in my judgment, be advisable to invest all moneys belonging to the 16th section or other educational fund, hereafter paid in the treasury, into notes or mortgage bonds, bearing eight per cent. interest, amply secured by first lien upon unincumbered real estate, in the various counties where this fund belongs; the interest payable annually to the townships to which such interest is due, and payable under such restrictions as will secure the prompt payment of the same; or if deemed more expedient, they may be invested in United States Government or other bonds for the use of schools. I would further recom-

mend that a "Sinking Fund" be provided by law, setting apart annually a certain sum received from all sources of revenue, or a definite proportion of taxes collected annually, for the purpose of liquidating this indebtedness, at no distant day, and secure its investment as required by the provisions of the grant or trust from the United States.

The principal of the Sixteenth Section Fund is due the several counties as indicated in Exhibit No. 7, and by statute the people in the various townships are the beneficiaries of this fund forever; nor has the State of Alabama the right even to bargain or sell any portion of the unsold sixteenth section lands, without first submitting the question to the people of the township to which the lands belong.— (See statutes referred to.)

ONE-FIFTH OF REVENUE FOR SCHOOL FUND.

It will be seen in "Estimated Expenditures," Exhibit No. 1, for the fiscal year ending September 30th, 1870, the item of \$137,290 20, as stated, is one-fifth of the revenue from all sources during the fiscal year 1869.

A question has arisen, whether this can be certified from this office on December 1, 1869, to the State Superintendent for school purposes, to be expended in 1870, as the tax assessment was made under the late Revenue Law, and not under the requirements of the present Constitution, which authorizes said appropriation.

It is suggested that the General Assembly should, by an act, designate the solution of this question.

FEEDING STATE PRISONERS.

Attention is called to the large expenditure incurred by the State for feeding State prisoners annually, under existing laws, amounting this year to \$67,329 50. When it is remembered that the money paid for this service is from the hard earnings of the tax payer, and the amount annually increasing with the increase of population, the inquiry is naturally suggested, "Cannot the State be relieved of much, if not all, of this expenditure by a change in the laws in relation to criminals and prisoners charged with crime?"

A change has been suggested, making such expense a

charge upon the several counties of the State. This, without other modifications, would only transfer the evil without curing it. There are many reasons, however, why the expense should be chargeable to the county rather than the State. The counties now receive the benefit of all "fines and forfeitures" paid by solvent criminals; why, then, should they not be chargeable with feeding those too poor to pay either fine, or board while in jail? Some counties have already made provision for "hard labor of criminals," under the sentence of the courts for minor offenses, and could readily take charge of all persons in their jails, if provisions of law required them to do so. While a person charged with an offense against the State may properly become a charge against the Treasury; yet it will not be forgotten that the money furnished the State Treasury comes direct from the several counties. It is only a question of expediency and sound policy, as the expense now paid for this service is paid indirectly by the counties.

I would therefore recommend that the laws now in force be so changed that counties will become chargeable with the keeping and feeding of all prisoners, and that authority of law be given for the erection of work houses by the various counties in the State, for the hire of all criminals convicted of petit larceny, and other minor offenses; and further require that the judgments of the courts, when pronounced against them, shall specify the penalty in days of "hard labor in the county work house."

While no hard labor should be required of persons awaiting action of the courts, yet if provision be made in county work houses for the *voluntary* labor of this class, a great saving could be secured, as doubtless a large number of persons who are, to-day, lying in the jails of the several counties unable to make sufficient bonds, would cheerfully avail themselves of an opportunity to labor, if while so doing they could earn their board and also something for themselves or their families.

No better sanitary regulations could be devised for prisoners, than daily exercise of mind and muscle at regular intervals; and this could be accomplished by provisions of

the law now recommended. It will be found more practicable, in the execution of this plan of "labor for criminals," to require counties to be responsible for care of the same, rather than the State. Each county can, in that case, elect how the prisoners shall be kept, what price shall be paid for feeding the same, which should be governed by the cost of provisions, &c., in each county, and depend largely upon the number annually confined in its jail.

If, however, the State is still to remain charged with this heavy expenditure, I would earnestly recommend the erection of work houses, or houses of correction, under such regulations as may be deemed expedient or necessary, in every county where the annual expense for feeding State prisoners is in excess of two thousand dollars.—(See statement in Exhibit No. 3.)

ALABAMA INSANE HOSPITAL.

The Alabama Insane Hospital, located at Tuskaloosa, together with the farm buildings and other improvements connected therewith, belongs to the State; and is under the direction of seven trustees, appointed by the Governor and approved by the Senate. Any or all of these trustees are removable, at the pleasure of the Governor or Senate.

It is provided by law that the State shall be chargeable only for salary of officers, and the keeping of "indigent insane," and that "persons in indigent circumstances while residing in the hospital, and whether, in their own right, or by reason of the State bearing their expenses, must be chargeable with *no more* than actual cost for clothing nursing, board, and medical attendance."—See Sec. 1048, Revised Code.

Your attention is called to the following facts, as shown by records in this office :

The whole amount paid by the State to this institution including moneys for repairs, and extension of building for six years prior to 1868, was \$67,393 80, or an average of \$11,232 30 annually.

The amount paid during the year 1868, and 1869, to include payment for June 30, 1869, is \$72,908 00, or an

annual average of \$36,454 00, which is in excess of entire payment for six years; as above stated. I would fail in the discharge of my duty, should I not call the attention of your Excellency, and through you, the attention of the Legislature, to this unprecedented expenditure.

Being called upon in the discharge of my duty to audit an account of this institution, for nearly twenty thousand dollars, I referred the account back to the officers of the hospital, for vouchers showing that the amount "was for actual cost of clothing, board, &c.," as by law required. The correspondence now on file in this office shows that instead of making out accounts against the State for "actual expenses incurred" quarterly, the Superintendent and Treasurer have sent in "estimated expenditures," and have charged uniformly four dollars per week for each patient on the indigent list. I then required the account to be verified by affidavit, which was accordingly done, as will be shown by the following extract in affidavit of the Superintendent, stating that the amount "is just and correct, and due the hospital for actual expenses, &c., as set forth in said account, and that no portion of the same has been paid by discount or otherwise."

You will thus see that the amounts drawn from the treasury were stated to be for *actual expenses*, but upon examination of the account of Mr. W. Moody, Treasurer, we find that on the 25th day of October, 1867, he had on hand \$5,457 40, and on the 28th day of October, 1868, he had on hand a balance of \$9,866 16.

Since the last date above named, there has been paid by warrant from this office on account of the hospital, the sum of \$38,424, making the full amount to be accounted for this day (October 12, 1869) \$48,290 16; with a claim still unpaid for the quarter ending September 30, 1869. Take the above, in connection with the fact, that by official report of the hospital for last year, there was on hand October 15th, provisions, clothing, &c., to the value of \$6,224 34, and no indebtedness shown, we are forced to the conclusion that *more money* has been drawn from the State Treasury by the Superintendent and Treasurer of the hospital, than

was necessary for "actual cost of clothing, board, &c." We are not left to even a conjecture in the premises, as the same fact is clearly shown by official letters of these officers.

In a letter of date July, 1868, signed by Hon. P. Bryce, Superintendent, he says: "We have received, and supported comfortably, all the indigent insane who have been sent, have contracted no debts, paid all the salaries, and have a small balance on hand. Strictly speaking, the support of the indigent, including clothing, and everything else, has not cost two dollars per week. This will give you an idea of the economy practiced in the management of the institution." In a subsequent letter it was claimed that he intended to say "less than three dollars per week."

In the annual report of this institution, dated October 15th, 1868, the Superintendent says: "The daily average of patients in hospital during the year is 140-43. The per capita cost, therefore, of supporting the insane, has been \$180 70. If it should be thought proper, however, to include the cost of building and extraordinary repairs, which is hardly fair, the cost of each patient is only \$187 05 for one year, including everything."

"Let it be distinctly understood that a daily average of 140 patients have been boarded, clothed, lodged, and medically treated; that the salaries and wages of Superintendent, Physician, Officers, and Employees, have been paid; that a large building has been kept in repair, and important additions made at total of \$26,267 98, and at an average of \$187 05 for each patient per annum, or a little more than \$15 per month."—(See Report.)

No further reference need be made to demonstrate what has been claimed in this report. If \$26,267 98 was the total cost of hospital for the year ending October 15, 1868, why did they certify to this office \$34,484 as actual expenses, especially when the Treasurer's report shows that on the 25th day of October, 1867, there was a balance in the Treasury of \$5,457 46?

If the total cost for repairs, additions, &c., together with salaries of all officers and employees, and expense of

patients, was, as stated in report above referred to, about \$15 per month for each patient, why did they draw, as the records show they have done, over \$17 per month for each patient, and also certify and draw the money for salaries of officers to the amount of \$4,000 per annum besides?

There is no resisting the conclusion, that *more moneys* have been drawn by the officers of the Insane Hospital than contemplated in the statute referred to, and I would recommend that the law be so amended that payments will be made hereafter upon accounts stated, of *actual expenses incurred*, allowing them, if deemed necessary, a deposit of \$10,000, so that the hospital will always be in funds to meet current expenses.

The State is under the highest obligations to provide amply and promptly, regardless of the amount of expenditure necessary, for these unfortunates of our race, who are, in the providence of God, left without their reason, and their wants should ever be a *first* claim upon the Treasury.

I wish it distinctly understood that no charge is made of misapplication, or embezzlement of funds by the officers of the hospital; yet I do claim that they have drawn from the State Treasury more money than the actual cost, as contemplated in sections 1048, and 1064, Revised Code. If the former reasons are not entirely conclusive, as drawn from their own statements, the further fact that two entire quarters passed without application for pay, shows that they have over-drawn funds sufficient to defray expenses of the hospital for more than six months, as they have just received warrant for quarter ending June 30th, 1869.

It is clearly apparent, that under a true construction of the law, no money should be drawn for use of hospital, except salaries of officers and employees, and cost of keeping indigent patients, and this amount should never be drawn upon "estimated expenditures," unless it be for the quarter next ensuing, the date of drawing the money, when there are no funds on hand.

The Treasurer, Mr. W. Moody, in his report for fiscal year, ending 28th October, 1868, acknowledges receipt of but

\$27,308 from the State, while the records of this office show that the hospital received, by warrants issued, the full sum of \$34,484—the last warrant bearing date July 3d, 1868.

This would give a balance on hand, October 28th, 1868, of \$17,042.16, instead of \$9,866.16, as reported by the Treasurer.

The statement of the foregoing facts presents the strongest possible argument for such changes in the requirements of law as will compel the officers of the hospital to present vouchers for warrant on the State treasury for *no more* than “actual cost, &c.,” which shall only embrace the amount actually expended, from time to time, for hospital purposes, under the provisions of the statute regulating the same.

I would further recommend that a contingent fund be placed at the disposal of the Board of Trustees, for necessary repairs of building, machinery, &c., and require full statement, with vouchers, of amount annually paid from said fund.

INSURANCE COMPANIES.

A full list of “Insurance Companies, not incorporated by the State,” which have complied with the laws regulating the same, will be found in Exhibit No. 5, together with list of Fire and Marine Insurance companies, which have made deposit of \$10,000, as required by act approved December 31, 1869.

RECEIPTS AND DISBURSEMENTS.

Estimates of expenditures to be defrayed from the Treasury, for the ensuing year, together with estimated receipts, will be found in detail in Exhibit No. 1, accompanying this report.

TWO AND THREE PER CENT. FUNDS.

Final disposition of these funds, donated by the General Government, having been fully made by the legislative action of the last General Assembly, the following summary history of the original grant, and application thereof, will be found interesting to all concerned.

By an act of Congress, entitled "An act to enable the people of Alabama Territory to form a Constitution and State government," &c., approved March 2, 1819, the United States reserved five per cent. of the net proceeds of the lands lying within said territory, sold from and after September 1st, A. D., 1819, for making public roads and canals, and improving the navigation of rivers, "of which *three-fifths* shall be applied to those objects within said State, under the direction of the Legislature thereof, and two-fifths to the making of a road or roads leading to the State, under the direction of Congress."

The moneys arising from the sale of public lands in this State, and paid into the treasury under this act, have been designated the "Two and Three per cent. Fund."

The Convention, which met at Huntsville, in compliance with said act, "to form themselves into a free and independent State," declared, by ordinance, adopted August 2d, 1819, for and in behalf of the people then inhabiting this State, that "they accepted the proposition made by Congress, to be held as irrevocable, without the consent of the United States."

The terms of this grant, giving three-fifths of this fund to be disposed of by the State, and the remaining two-fifths under direction of the general government, continued in full force until the year 1841, when, by act of Congress, dated September 4th, of that year, the whole of the two per cent. fund was relinquished to the State, under stipulations therein contained.

The Legislature of Alabama, by an act approved December 29, 1841, accepted the relinquishment above mentioned, upon the terms and conditions of the 17th section of said act, which required the moneys arising from said fund "to be faithfully applied under the direction of the Legislature, to the connection by some means of internal improvements, of the navigable waters of the bay of Mobile, with the Tennessee river, and to the construction of a continuous line of internal improvements, from a point on the Chattahoochee river, opposite West Point, Georgia, across the State of Alabama, in the direction of Jackson,

Mississippi ;” and further declared, so far as relates “to the faithful application of said Two Per Cent. Fund, to the purpose aforesaid, this act is hereby declared unalterable, without the consent of Congress.”

After the passage of this act, the State became the sole trustee for the faithful application of both funds ; for the three per cent. fund as originally granted by Congress, and for the two per cent. fund under provisions above mentioned in said act.

As trustee for the three per cent. fund, the State, by act approved December 10th, 1823, invested the same in capital stock of the “Bank of Alabama,” and pledged the faith and credit of the State to supply any deficiency in the fund specifically invested, and gave indemnity for all losses arising from deficiency in the fund, and further enacted that the moneys belonging thereto should constitute a part of the capital of said bank. It was further enacted, that “the net proceeds, or banking dividends of said capital, should be applied to the making of roads and canals, and improving the navigation of the rivers within said State, or be so invested as to augment the capital until such application should be directed by law.”

Under the provisions of the act last mentioned, there was paid to the State Bank, from January 23d, 1823, to November 13th, 1843, the sum of \$243,403 35.

The State Bank, from the 9th day of November, 1826, to the 8th day of November, 1834, declared dividends to this fund to amount of \$104,858 30.

There is no official record of any further dividends having been declared to the credit of this fund, after the 8th day of November, 1834.

By act of the Legislature, dated January 10, 1835, the profits of the State Bank, on all funds held in trust, except the University Fund, were “set apart” and denominated a “Sinking Fund.” The profits of the bank at this time exceeded the entire expenses of the State Government and interest on bonds then issued. There was paid by the State Bank, (as shown by a table furnished by Joint Committee of the General Assembly, dated January 17, 1860,)

and charged to this sinking fund, the sum of \$135,000, under acts of the Legislature of 1837 and 1839.

The State having thus changed the original act, by which she became responsible for the application of this fund, under agreement with the United States, it was held by a joint committee selected from both houses of the General Assembly, that the State was held liable as the trustee for all moneys received, together with interest at the rate of six per cent., from the date of receipt from the United States Treasury. After a careful examination of the whole account, this committee reported that there was due this fund on the 1st day of January, 1860, the sum of \$858,498, for which the State was as clearly responsible as for any fund held in trust by a trustee. The Legislature concurred in the opinion of the committee, and adopted their report. An act was then passed by the Legislature, entitled "An act to loan and appropriate the three per cent. fund and its interest," approved February 18, 1860. By this act the sum of \$858,498 was declared to be the amount due as principal and interest from the State, of which sum \$195,363 was the balance due, as a loan to the Tennessee and Coosa Railroad Company, under act approved February 17, 1854, and the balance of that fund, amounting to \$663,135, was loaned and appropriated as follows:

Loan to Northeast and Southwest Railroad Com-	
pany.....	\$218,000
Wills Valley Railroad Company.....	75,000
Telma and Gulf Railroad Company.....	40,000
Cahaba and Marion and Greensboro Railroad Com-	
pany.....	25,000
Opelika and Oxford Railroad Company.....	50,000
Montgomery and Eufaula Railroad Company....	30,000
Tennessee and Coosa Railroad Company, (before	
mentioned).....	195,363
Alabama and Tennessee Rivers Railroad.....	225,000

Making a total of.....\$858,363

The above loans were authorized by the Legislature, under certain conditions contained in said act, at the rate of six per cent., the interest made payable semi-annually into the State Treasury by said corporations.

By the act approved February 18, 1860, it is declared as per section 13, "that the true intent and meaning of this act, is to limit and confirm to the Tennessee and Alabama Central Railroad Company the sum of \$663,135, and "interest thereon;" but it further declares that the State shall *in no* way become liable to said road for any amount which may be lost by loans made as therein specified.

It further provides, "that the said Tennessee and Alabama Central Railroad Company shall receive the obligations of the various companies, if unpaid at the time said Tennessee and Alabama Central Railroad Company may be authorized to apply for the appropriation provided for in the eighth section of the act, in lieu of money, and in that case the said Railroad Company shall have the benefit of all the rights, securities and remedies provided for in the loans to be made to other railroad companies, under the provisions of this act, nor shall the State be bound to make good any loss sustained by failure to collect the obligations aforesaid."

By act of the Legislature, approved July 30, 1868, the Mountain Railroad Contracting Company was declared the beneficiary of the three per cent. fund, under the act to loan and appropriate this fund, before mentioned, and by this act that company was duly authorized to make settlement with any of said companies who obtained loans under the act approved February, 1860, and receive any moneys, funds, or securities arising under such settlement, upon giving bond, as required by the act aforesaid, for faithful application thereof.

For the purpose of making final disposition of the three per cent. fund and its interest, the Legislature, by an act approved December 30, 1868, provided for full settlement of the same, on the part of the State, giving authority to the Governor "to turn over to the Mountain Railroad Contracting Company the bonds, obligations, and securities, &c., belonging to said fund; and provided further, that the bonds, &c., turned over shall be a satisfaction to the full extent thereof, of the claim of said company, on account of said three per cent. fund." The act also pro-

vided that the Mountain Railroad Contracting Company should give bond to the satisfaction of the Governor for the faithful application of said bonds, obligations, and securities, to the construction of the road from Lime Station, in in Shelby county, to Decatur, in Morgan county, Alabama.

By an act of the General Assembly, approved December 30, 1868, the corporation known as the South and North Alabama Railroad Company, was recognized as the successor of the Mountain Railroad Contracting Company, and was fully authorized to assume, and take upon itself all contracts and obligations, and to have, and enjoy, all the rights and franchises of the Mountain Railroad Contracting Company. The South and North Alabama Railroad Company has thus become the beneficiary of this fund, and in pursuance of the act before mentioned, this company has taken steps to accept the bonds, obligations, and securities, by filing bond, and assuming full control of this fund as provided in said act.

TWO PER CENT. FUND.

The following sums of money have been paid from the proceeds of the two per cent. fund, prior to the year 1860 :

March 1, 1845—Montgomery and Eufaula Railroad.....	\$116,782 64
December 13, 1853—Marengo Plank Road Company.....	9,477 47
February 27, 1855—Alabama and Mississippi Rivers Railroad.....	78,036 28
May 8, 1855—Alabama and Mississippi Rivers Railroad.....	28,963 72
February 15, 1858—Alabama and Mississippi Rivers Railroad.....	23,178 74

Total, across the State.....\$256,438 85

The line from Alabama river to Tennessee river, North and South :

May 3, 1851—Alabama and Tennessee Rivers

Railroad..... \$65,961 73

May 5, 1852—Alabama and Tennessee Rivers

Railroad 62,179 83

April 26, 1855—Alabama and Tennessee Rivers

Railroad 17,726 47

February 13, 1858—Alabama and Tennessee

Rivers Railroad..... 23,178 78

February 13, 1856—Tennessee and Coosa Riv-

ers Railroad..... 33,513 25

Total, North and South line..... \$202,551 02

Total amount expended..... \$452,989 87

There was due this fund on the 1st Oct., 1859, \$12,589 17

Received from U. S. Treasury Aug. 24, 1860, 934 94

Montgomery and West Point Railroad, August

24, 1860..... 5,849 13

Montgomery and West Point Railroad, part

payment on loan. 30,000 00

Montgomery and West Point Railroad, cash,

Oct. 31, 1860..... 2,882 99

Total..... \$52,246 23

This was paid out by the State as follows:

To Jas. L. Price, President, Aug. 24, 1860.... \$30,000 00

To Thos. A. Walker, President, Feb. 11, 1861, 22,246 23

Total..... \$52,246 23

The following balances are shown against the incorpo-
rations named below, a portion of which, by act of the Leg-
islature, belong to the South and North Alabama Railroad
Company, as beneficiary of the two and three per cent.
fund:

Cahaba, Marion and Greensboro Railroad, July

24, 1868 \$29,700 00

Interest due, Aug. 8, 1869..... 2,250 00

Total..... \$31,950 00

Montgomery and Eufaula Railroad, October	
1st, 1867	\$32,700 00
Interest due, May 17, 1869	4,045 00
Total	<u>\$36,745 00</u>
Opelika and Oxford Railroad, Oct. 1, 1867	
Interest, July 21, 1869	\$61,075 00
Total	<u>5,425 00</u>
Total	
<u>\$66,500 00</u>	
Alabama and Tennessee Rivers Railroad, Oct.	
1st, 1864	\$592,170 93
Northeast and Southwest Alabama Railroad,	
July 23, 1868	\$306,468 00
Wills Valley Railroad, Oct. 1, 1867	
	\$87,375 00
Marengo Plank Road Company, Oct. 1, 1864,	
	<u>\$5,518 97</u>
The balance due the State, on account of the	
three per cent. interest fund, Oct. 1, 1867,	
amounts to	\$43,738 70
The amount to the credit of the two per cent.	
fund, is	<u>\$3,758 50</u>

From official information received, the Northeast and Southwest Alabama Railroad Company, and the Wills Valley Railroad Company have been consolidated, and under the style and title of the Alabama and Chattanooga Railroad Company, have cancelled the amounts named above, shown as balances due from said companies by the delivery to the Governor of second mortgage bonds, to amount of \$461,000, with coupons attached, due and payable on the 1st day of July, 1872.

These bonds are now in the office of the State Treasurer, ready for delivery to the South and North Alabama Railroad Company, the beneficiary of this fund.

CERTIFICATES OF RAILROAD STOCK.

There is on file, in this office, the following certificates

of stock, as per the sixth section of the act approved February 4, 1850, appropriating certain funds to the Alabama and Tennessee Rivers Railroad Company :

Certificates signed by J. W. Lapsley, President, &c., dated Sept. 30, 1851.....	\$ 91,641 54
Certificates signed by T. B. Goldsby, President, &c., dated June 1, 1855.....	58,446 06
Certificates signed by Thos. A. Walker, President, &c., dated February 1, 1861.....	22,246 23
Total	\$172,333 83

AUDITOR'S OFFICE,
October 12, 1869. }

Since writing the foregoing report of the condition of the two and three per cent. funds, this office has been officially notified of the formal acceptance of bonds, obligations, securities, &c., by the South and North Alabama Railroad Company, under the provisions of the act approved December 30, 1868, and have filed the required bond.

Upon the approval and filing the bond in this office, the Governor has surrendered to this corporation the following securities under said act, with statement of account, viz :

MORTGAGE BONDS, &C.

Northeast and Southwest Alabama Railroad Company.....	\$306,468 00
Wills Valley Railroad Company.....	87,375 00
Alabama and Mississippi or Western Railroad Company.....	156,782 64
Opelika and Oxford Railroad Company.....	66,500 00
Montgomery and Eufaula Railroad Company.	36,051 84
Cahaba, Marion and Greensboro Railroad Company.....	38,611 75
Total.....	\$691,789 43

CONCLUSION.

In transmitting this Report, I am requested to call the further attention of your Excellency to the fact that Foreign

Insurance Companies, or "Insurance Companies not incorporated by this State," complain, and I think justly, that they are, by the Revenue Laws, taxed 100 per cent. more than "Home Companies," which is deemed by them to be contrary to the principles of the Constitution of the United States. The Legislature should at once give relief from the collection of the tax which discriminates against foreign companies, if, in their judgment, the tax is improperly levied.

All of which is respectfully submitted.

R. M. REYNOLDS,

Auditor.

Aggregate Indebtedness.....		\$8,356,083 51

MEMORANDUM.—Bonds unsold in the hands of Lehman, Durr & Co., Financial Agents, (eight per cent.) \$173,400 00.

*NOTE.—This item of indebtedness does not strictly belong to the "school fund," yet, so long as Section 957, Par. 1, Revised Code, is unrepealed, eight per cent. annual interest must be provided by the State upon this amount for schools : thus making it substantially as reported above.
